**DETAILED ACTION**

***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-15, 17-18, drawn to a floatation device, classified in class 441, subclass 1.
  - II. Claims 19-33, drawn to floating barrier arrangement, classified in class 405, subclass 26.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions Group II and Group I are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because as evidenced by claim 25 having "an outer solid water impermeable elongate tubular shell member, an inner solid water impermeable elongate tubular shell member concentric with said outer tubular shell member and spaced therefrom so as to form a cavity therebetween, a floatation medium within said cavity and a floatation medium within said inner tubular shell member is not required by the combination claim (claim 25). The subcombination has separate utility such as buoy.

Art Unit: 3673

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
